## OBJECTIVE

To obtain a Summer 2026 internship in advanced computing (software engineering or HPC systems engineering) to leverage my experience and interests in MPI-based parallelism, hybrid CPU-GPU optimization, and agentic-assisted software development.

## EDUCATION

<b>University of New Mexico</b> <i>Major: Computer Science (Engineering)   Minor: German Language, GPA: 4.14/4.0</i> <ul style="list-style-type: none"><li>Awards: Dean's List (5 semesters); Woodward Scholarship (4 years)</li><li>Relevant Courses: High Performance Computing   Parallel Processing   Numerical Computing   Linear Algebra   Algorithms 1   Design of Large Programs   Computer Logic and Design   Mathematical Statistics   Calculus I/II</li><li>Spring 2026 Courses: Computer Architecture and Design   Algorithms 2   Software Engineering   Physics 1</li></ul>	Albuquerque, NM Aug. 2022 – Present
<b>Freie University</b> <i>European Studies Program, Intensive German Language Program (B2/C1)</i>	Berlin, Germany Aug. 2024 – Dec. 2024
<b>Google Cybersecurity Professional Certificate</b> <i>8-course cybersecurity certification program</i>	Coursera Online June 2024

## EXPERIENCE

<b>Research Assistant</b> <i>UNM Department of Computer Science, Advisor: <a href="#">Dr. Amanda Bienz</a></i> <ul style="list-style-type: none"><li>Benchmarked the <a href="#">Hypre</a> algebraic multigrid (AMG) linear solver on the <a href="#">DeltaAI</a> HPC cluster at UIUC</li><li>Extended existing C++ software to optimally leverage CPU and NVIDIA GH200 GPUs in AMG linear solvers</li></ul>	May 2025 – Present Albuquerque, NM
<b>Faculty Assistant / Tutor</b> <i>UNM Department of Computer Science</i> <ul style="list-style-type: none"><li>Created a curriculum to teach Git/GitLab to incoming and enrolled CS students</li><li>Produced <a href="#">educational YouTube videos</a> teaching the curriculum</li><li>Tutored undergraduate computer science students in a variety of classes</li></ul>	May 2024 – May 2025 Albuquerque, NM
<b>Teaching Assistant</b> <i>UNM Department of Computer Science</i> <ul style="list-style-type: none"><li>Assisted in teaching duties for Intermediate Programming (CS 251) section with 18 students</li><li>Led weekly lab sessions, helped students with content understanding, graded homework</li><li>Hosted weekly office hours, helping students 1-on-1 with homework and programming assignments</li></ul>	Jan. 2024 – May 2024 Albuquerque, NM

## PROJECTS AND ACTIVITIES

<b>Student Cluster Competition</b>   <i>HPC, Linux, C++</i> <ul style="list-style-type: none"><li>Collaborated with teammates to optimize applications on VMs ran on the <a href="#">Jetstream2</a> cloud system</li><li>Built and ran climate applications across multiple nodes using slurm</li></ul>	Jul. 2025 – Present
<b>UNM App Contest</b>   <i>Full stack development</i> <ul style="list-style-type: none"><li>Create an app to help voters understand their local elections and candidates</li></ul>	Aug. 2025 – Present
<b>HPBench</b>   <i>Python, HPL</i> <ul style="list-style-type: none"><li>Local web application to run parameters sweeps for the <a href="#">HPL</a> (High Performance Linpack) benchmark</li><li>Displays results for the tested HPL configurations using matplotlib</li><li>Currently adding other benchmarks for HPC (STREAM, HPCG, ...)</li></ul>	Oct. 2025 – Present
<b>GitHub:</b> <a href="#">Scrabble</a>   <a href="#">Word Search Solver</a>   <a href="#">LCG cipher</a>	

## TECHNICAL SKILLS

**Development:** Java | C/C++ | Python | Jupyter Notebooks | MATLAB | Bash | Claude Code | Codex | Github Copilot  
**HPC:** *Benchmarks* – HPL, STREAM | *Systems* – JetStream2, [CARC](#), DeltaAI | *Tools* – MPI, slurm, spack  
**Tools:** Git/GitHub | LaTeX/Overleaf | Linux | MacOS | Windows | Microsoft Office Suite | Google Workspace
